

## **Kaybob Area Incident Update: October 18, 2016**

Actions taken October 17<sup>th</sup>, 2016 included:

Continued focus on improving site access, recovering fluids and collecting water and soil samples.

- Access:
  - Continued to grade and maintain primary access road to minimize damage to the road and minimize driving safety hazard
  - Continued inspections of the site
  - Staged rig mats for additional access to aqua dam and completed loading area for recovered water
- Sampling:
  - Water sampling activities continued
- Recovery, Containment and Waste Management:
  - Fluid continues to be recovered and pumped into onsite tanks, then transported for disposal at an approved waste facility
  - Completed excavation and installation of a new recovery trench. Pumping and disposing of fluids from this new trench began immediately after construction
  - Completed soil containment cell
  - Inspected and maintained existing booms
- Wildlife Monitoring:
  - Wildlife crew continued to monitor for wildlife
  - Completed sweeps at spill perimeter for wildlife signs and game trails
  - Inspected and maintained flagging at beaver ponds
  - Continued to maintain snow fence
- Water Control:
  - Completed installation of aqua dam
- Other:
  - Trilogy continues to work to determine the cause of the leak and the volume of the spill

Subject to weather conditions, actions planned for October 18<sup>th</sup> include:

- Continue analytical updates from delineation and monitoring points (water and soil samples)
- Monitor and maintain new trench
- Continue improving access around release location
- Complete matting at turnaround site to haul impacted surface water from storage tanks
- Conduct soil and water sampling and field screening from selected areas
- Conduct electrical conductivity profiling of pond areas
- Inspect and maintain the booms
- Continue to recover fluids and haul to disposal site
- Continue inspections and surveillance and continue to monitor and divert wildlife
